

# WARNOCK HERSEY Seal of Approval

## Testing Safety & Performance

The Intertek Warnock Hersey Mark is North America's most recognized product safety and performance mark for building products. Today, the mark appears on more than 4,000 building and construction products, from hearth products to hardware, manufactured wood, plumbing, roofing, and various other products. *The* WH mark is a certification mark issued by the ETL SEMKO division of Intertek. The WH mark demonstrates product compliance to safety and/or performance standards. Neither Intertek nor Warnock Hersey manufactures products of any kind.

## Certified Compliance to Standards

Building and construction materials bearing the WH Mark indicate to your customers and end-users product compliance to relevant building codes, association criteria, and product safety and performance standards. The mark also signifies that the product's manufacturing site(s) undergo periodic follow up inspections to ensure ongoing compliance of the originally certified product. In short, a field inspection consists of line sampling and inspection to ensure that the product continues to be produced in the same manner as the product that was originally certified.
